Demo Lecture 1 - Study Portal Web Application

Course: Web Application Development Demo (WAD100)
Instructor: Teaching Assistant Vito Zupanovic

Added: 2026-05-31 16:18:51

Summary

Demo material for a student web app showing courses, file upload metadata, file cards, and basic CRUD operations.

Project goal

- Create a small study portal where students can view course files, open files, edit file metadata, and delete records.
- The project demonstrates form handling, validation, state updates, and simple persistence.

Main screens

- Courses page: shows available courses.
- Files page: shows uploaded learning materials grouped by course.
- Add file form: stores course, file name, file link, and created date.

Suggested validations

- Course must be selected.
- File name must not be empty.
- File link must start with http, https, or a local application path.
- Duplicate file names inside one course should be rejected.

Test scenarios

- Add a valid file and confirm that it appears as a card.
- Edit a file name and confirm that only the selected card changes.
- Delete a file and confirm that it is removed from the list.

Quick reference

Field	Example value	Validation
Course	Algorithm Design and Analysis	Required
File name	Lecture1.pdf	Required
File link	/files/Lecture1.pdf	Required path or URL
Added date	2026-05-31 16:18:51	Generated by app
